SUMMARY

Game-development-focused BCA graduate with hands-on experience in Unreal Engine 5, C++, Blueprint, Blender, gameplay systems, AI behavior, animation integration, and 3D environment development. Developed a horror game prototype featuring enemy AI, player interaction, environmental exploration, and combat mechanics. Strong foundation in object-oriented programming, problem solving, and real-time 3D development. Seeking an entry-level Junior Game Developer, Gameplay Programmer, or Unreal Engine Developer position.
